ASX ANNOUNCEMENT

Guildford Executive Buys Shares

Guildford Coal Limited (Guildford or the Company) (ASX: GUF) is pleased to advise that Julien Lawrence, its Chief Operating Officer (COO), has acquired 2 million shares of the Company stock on the open market, over the course of the last 2 weeks.

Mr Lawrence heads Terra Energy Ltd, a wholly owned subsidiary of Guildford Coal in Mongolia, which is ramping up production at its Baruun Noyon Uul (BNU) mine in South Gobi. As the Company's COO since early 2013, Mr Lawrence's comprehensive knowledge of the business and skillset, have played a key role in the Company's recent transition from explorer to miner.

"The management team and Board are delighted with Julien's decision to invest not only his professional time, but also hard earned money into the Company. It shows confidence that the Company is on the right track to deliver shareholder value, which should be reassuring for investors," said Mick Avery, Group Managing Director.

Last month, Guildford Coal announced that it had been granted two highly prospective coal exploration licences: one located in close proximity to the BNU mine, and another, named Barum Termes, in North Western Mongolia.

Most recently, the Company signed a Memorandum of Understanding to acquire an 80% stake in a large thermal coal project and an associated power generation project with regulatory approvals already in place.

Over the past 6 months, Guildford has focused on Asia – restructured its Board and management team, and established a regional office in Singapore, a strategic move to be closer to shareholders, financiers, existing mining operations and customers.

Julien Lawrence has recently been interviewed by Bloomberg Mongolia, to watch the interview, please visit: <http://www.guildfordcoal.com.au/investors/media/>

ABOUT GUILDFORD COAL www.guildfordcoal.com.au

Guildford Coal has recently transitioned from being an explorer to miner. Production at the Baruun Noyon Uul (BNU) coking coal mine in the South Gobi Mongolia successfully restarted in late 2014. Guildford has recently secured offtake agreements with 2 end-users in China. The Company's goal is to become one of the largest and highest quality coking coal producers in Mongolia, providing exceptional value for its steel-producing customers. Guildford Coal is also focused on developing two priority projects in Queensland, Australia: the large thermal coal Northern Galilee Project and the PCI/thermal coal Springsure Project.
