ASX Announcement

CHANGE IN CLASSIFICATION TO A MINING PRODUCING ENTITY

The Board of TerraCom Limited (TerraCom or the Company) (ASX: TER) is pleased to announce that the ASX has confirmed the Company's change in classification from a mining exploration company to a mining production company.

As a result of the change in classification:

- the Company will continue to lodge quarterly mining activity reports, but will no longer be required to lodge quarterly cashflow reports (Appendix 5B); and
- the Company will now have to lodge a preliminary final report (Appendix 4E) and half year report (Appendix 4D), in each case within two months of end of the relevant reporting period (30 June and 31 December respectively).

ABOUT TERRACOM – terracomresources.com

TerraCom has fully commissioned the Baruun Noyon Uul (BNU) coking coal mine in the South Gobi of Mongolia. Export shipments under a 5.5 year offtake agreement have commenced on schedule. The company's goal is to become one of the largest and highest quality coking coal producers in Mongolia, providing exceptional value for its steel-producing customers.

TerraCom completed the acquisition of the Blair Athol Coal Mine in May 2017. The acquisition included the mining lease, related licenses, land, site infrastructure, active contracts and all mining plant & equipment, including a dragline, to deliver TerraCom's forecast production schedule and the progressive rehabilitation.

The acquisition of the Blair Athol Coal Mine is a significant milestone for TerraCom, bringing the following benefits:

- Progressive rehabilitation of one of Queensland's oldest coal mines;
- The resumption of coal mining and export sales from the Blair Athol Coal mine providing the local, state and federal economies with increased economic activity, employment, royalties and taxation; and
- Forecast positive cash flow through a low overhead structure and operational efficiencies.

TerraCom has completed over 50 hectares of site rehabilitation while bringing the mine back into production. The operation, under TerraCom management, is planned to deliver approx. 2Mtpa over 9 years¹ and ongoing progressive rehabilitation.

Additionally, TerraCom has long term exploration plans with the intent on developing two projects in Queensland, Australia: the large thermal coal Northern Galilee Project and the high energy prime thermal coal Springsure Project.

1– Refer to ASX Announcement on 13th February 2018 for further information and clarification on the Blair Athol production forecast. The material assumptions underpinning the Blair Athol production target in this ASX Announcement continues to apply and has not materially changed.
